ABOUT ME

As a software developer with 4+ years of experience, I have a proven track record of success in full-stack web development across a variety of domains and tech stacks. Whether working with React.js/Nextjs, ReactNative, Redux/Context API, Node.js, Typescript, Tailwind CSS, Material UI Kit, GraphQl, Apollo Client/Server, Python, Django, Flask, Prisma, Docker, Redis, MongoDB, MySQL, AWS, Google Cloud Platform, PostgreSQL, or any number of other tools, I always strive to deliver top-quality results that meet the unique needs of each project. I take pride in my ability to design intuitive, user-friendly interfaces and scalable web backends that can support rapid growth and change. Additionally, I have significant experience working with Cloud Infrastructures, where I have maintained and configured a range of services to keep projects running smoothly. Above all, I am a flexible and adaptable team player who is always eager to learn and grow, no matter what technologies or methodologies are involved.

WORK EXPERIENCE

Mombo Sacco

Senior level | Full Stack Web/Mobile Developer
Nairobi , Kenya
2022-02-01 | Currently working here

As a software developer at Mombo Sacco, I am responsible for developing internal management systems that support daily SACCO operations. I am involved in every key implementation of the system and play a vital role in the decision-making process for implementing new features in the backend (using languages such as NodeJS and TypeScript), frontend (using React, TypeScript, and Redux), and the newly developed ReactNative mobile application. I am currently working on building a custom business intelligence tool to leverage the ever-growing data generated by the system.

ME Moringa for Life EPZ LTD

Mombasa , Kenya
Mid level IICT Officer
2020-03-01 | 2021-01-01

During my time at ME Moringa Company, I was responsible for a range of tasks related to IT infrastructure extension and maintenance. This included network administration and configuration, as well as repairing network equipment to ensure smooth operations. I also operated and maintained office equipment such as printers and copiers to ensure they were functioning optimally.

In addition to IT infrastructure tasks, I was also involved in web design and development, and provided customer support by answering client emails from website contact forms. I also managed online order processing to ensure timely and accurate delivery of products to customers.

One of my key contributions to the company was designing Moringa products using Adobe Illustrator, which helped expand the product range and generate more revenue. I also managed social media accounts and designed and shared newsletters as part of the company's marketing strategy, helping to increase engagement and sales.

Mzawadi

Mid level | Full-stack Web Developer
Nairobi , Kenya
2018-02-01 | 2022-02-01

As a React full-stack web developer at Mzawadi, I have had the opportunity to develop a range of solutions from back-end to front-end using technologies such as React/NextJS, Redux/Context API, Prisma, MongoDB, and MySQL. Some of the notable projects I have worked on include:
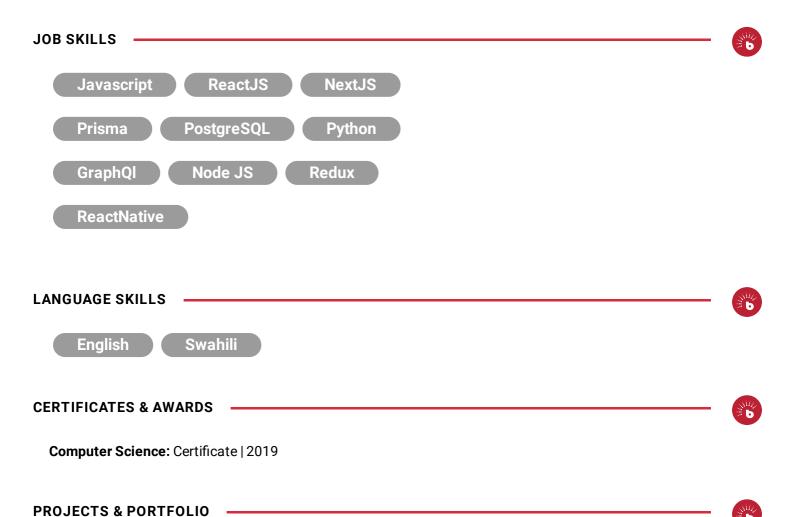

1. Jibukie App - This solution helps users secure appointments with available partnering clinics around the country. The app integrates a M-Pesa payment system to enable users to pay for booking fees, which is a primary source of revenue for the application. I played a key role in the development of this app. URL: https://jibukie-app.vercel.app/

2. NyumbaMkononi - This is a solution that enables middle-income earners and below to secure construction materials by paying and saving for them. The materials can be redeemed to actually construct a house. The app integrates M-Pesa and PayPal payment systems to enable users to pay for their targeted construction materials. I contributed significantly to the development of this app. URL: https://nyumba-mkononi.vercel.app/login

3. StationsAttendant App - This application helps filling station attendants reward points to their customers. Customers can also redeem these points at the stations, provided the points pass a certain threshold set by the management. I was part of the team that developed this app.

Overall, my experience at Mzawadi has allowed me to develop my skills in a range of technologies and has given me the opportunity to work on meaningful projects that have a positive impact on people's lives.

EDUCATION ───────────────────────────────────

Kibabii University

Bachelor | Bachelors in Computer Science

Nduluku High School

Highschool | KCSE

JOB SKILLS

Javascript   ReactJS   NextJS
